

Welcome to WundaSmart

Quick install guide

- A. First ensure your choice of Hub is set up and your App is installed.
- B. Mount the Connection Box near the manifold
- C. Connect the actuators to terminal 8
- D. Connect power 5, pump 6 and heat source 7
- E. Launch your App and choose **Devices**, then **Add device** and choose **Smart Connection Box**.
- F. Hold the Setup Button 2 and wait until it shows the device has been successfully paired.
- G. The Output Test Button is used to test the electrical output and the connection to the devices. Hold the Test Button 3 for 5 seconds or until the light begins to blink rapidly. Press the Test Button 3 again to move right along the outputs and press the Setup Button 2 to move left. To finish the test hold the Test Button 3 for 5 seconds.
- H. Configure Your installation in App
